

Ahmad Shahid

Junior Frontend Developer | React Developer

Lahore, Pakistan

+92 328 4641050

meharahmed417@gmail.com

Frontend developer with 2.5 years of experience in developing responsive and dynamic web interfaces using HTML, CSS, and JavaScript. Experienced in working with React.js and familiar with Next.js for building modern web applications, along with Tailwind CSS for scalable UI development. Focused on writing clean, maintainable code and improving overall user experience. Eager to further develop technical skills and contribute to professional development environments.

EXPERIENCE

NextClick IT Solutions — Frontend Developer

January 2024 - PRESENT

- Working on frontend development using **React.js** and **Next.js**
- Building UI components and improving website layouts
- Connecting APIs and handling data on the frontend
- Fixing bugs and making sure websites work smoothly on all devices
- Learning new tools and improving my React skills through real projects

Bin-Yousaf Solutions, *Intern* — Frontend Developer

February 2023 - December 2023

- Started my frontend journey by working with HTML, CSS, and JavaScript
- Created responsive web pages and basic website layouts
- Converted designs into working pages
- Fixed styling and layout issues
- Learned how real projects are managed in a team environment
